SUMMARY

B.Tech Information Technology student and full stack web developer. Builds and deploys React and TypeScript applications with Node.js, Express.js and MongoDB backends, with additional experience in Rust smart contracts on Stellar. Three hackathon podium finishes in the first year of college. Seeking a software engineering internship.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Rust, Java, C, HTML, CSS
Frontend: React, Vite, Tailwind CSS, Framer Motion, Zustand, React Query, React Router
Backend and Database: Node.js, Express.js, REST APIs, JWT authentication, MongoDB, Mongoose
Blockchain: Stellar, Soroban smart contracts, Stellar SDK, Freighter and Albedo wallet integration
Tools and Cloud: Git, GitHub, GitHub Actions, Vercel, Netlify, AWS, Docker, Postman, Vitest, Playwright

PROJECTS

VEDAX - Vedic Mathematics Learning Platform | Lead Developer
React, TypeScript, Tailwind CSS, Zustand, Node.js, Express.js, MongoDB | vedax-math.vercel.app

- Built a web application for learning and practising Vedic mathematics, with practice modules for all 16 sutras and a 60-second timed speed challenge.
- Developed a Node.js and Express.js REST API with JWT authentication and a MongoDB database, including a global leaderboard computed on the server.
- Implemented a guest mode that stores progress in the browser and merges it into the user account on sign-in.

RakshaMarg - Safety-First Navigation App | Team Member, Team DNA Coded
TypeScript, React, Python, MongoDB, Google Maps API | rakshamarg.app

- Contributed to a navigation application that scores each route from 0 to 100 for safety using street lighting, crime data and crowd density, and highlights the safest of three options.
- The application includes live location sharing with trusted contacts, a one-tap SOS alert, and nearby safe zones such as police stations and hospitals.

Swasthi - AI Health Assistant | Team Member, Team Sprinter
React, Python, Flask, MongoDB, Gemini AI | CodeSprint 2.0 Hackathon, JIS University

- Built an AI health assistant with symptom assessment and wellness guidance in Indian languages during a two-day hackathon, placing 13th.

OTHER PROJECTS: WEB3 ON STELLAR

- Built and deployed decentralized applications on the Stellar testnet with Rust and Soroban smart contracts and React and TypeScript frontends, with Freighter and Albedo wallet integration.
- SkillStake (goal staking with validator voting), AnchorBridge (milestone escrow), TicketChain (event ticketing), VoteSphere (on-chain voting), InvoiceX (invoicing and settlement), FundForge (crowdfunding).

ACHIEVEMENTS AND LEADERSHIP

- First Prize, AI for Bharat 2026 Hackathon, Meerut Coders (February 2026)
- Champion Title and 2nd Runner Up, Pragati - The Bengal Hackfest 2026 (April 2026)
- 3rd Position, TechSprint Hackathon, GDG on Campus Techno Main Salt Lake (January 2026)
- Top 30 Teams, Hack Among Us, Heritage Institute of Technology and Unstop (March 2026)
- Grand Finalist, Hack-O-NiT 2026, Narula Institute of Technology (April 2026)
- Formed Team DNA Coded, a five-member hackathon team; Volunteer, IIC Regional Meet 2025, Ministry of Education's Innovation Cell (November 2025)

EDUCATION

Narula Institute of Technology, Kolkata | Bachelor of Technology (B.Tech), Information Technology | 2025 to 2029
Sudhir Memorial Institute, Liluah | Class 12, Science (Physics, Chemistry, Mathematics) | 2025 | 76%
St. Helen's School, Howrah | Class 10, ICSE | 2023 | 89.8%

CERTIFICATIONS

AWS Cloud Practitioner Essentials, AWS Training and Certification (December 2025)
Stellar Journey to Mastery, Rise In and Stellar (June 2026)
Introduction to Data Science, Cisco Networking Academy (December 2025)
